Test Document: Simple PDF

This is a test PDF document created for testing the ingestion pipeline. It contains multiple paragraphs of text that should be extracted correctly.

The document processing system should be able to:
1. Extract text from native PDF files
2. Parse metadata like title and author
3. Handle multiple pages correctly
4. Preserve sentence boundaries for chunking

This paragraph contains enough text to test chunking algorithms. This paragraph contains enough text to test chunking algorithms. This paragraph contains enough text to test chunking algorithms. This paragraph contains enough text to test chunking algorithms. This paragraph contains enough text to test chunking algorithms.
